Feb 2026

TECHNICAL PROJECTS

Fetch – Educational Browser Game for charity: water | HTML, CSS, JavaScript

Summer 2026

- Engineered an interactive browser game featuring collision detection, state management, timers, score tracking, checkpoints, and win/loss logic using vanilla JavaScript.
- Developed responsive layouts with HTML and CSS to support desktop and mobile gameplay.
- Implemented local storage to persist player scores and progress across sessions.
- Debugged and optimized game logic through iterative testing and user feedback.

L'Oréal Product-Aware Routine Builder Chatbot | HTML, CSS, JavaScript, OpenAI API

Summer 2026

- Developed an AI-powered web app using the OpenAI API to generate personalized recommendations from real-world product data.
- Built dynamic JavaScript features for product search, filtering, selection, and real-time UI updates.
- Secured API requests with Cloudflare Workers, protecting sensitive API keys and backend communication.
- Implemented localStorage and conversational memory to preserve user data and support contextual AI interactions.

PROFESSIONAL EXPERIENCE
